

Exercise 1.10: Demonstrating Soft Skills

This exercise allows participants to engage with soft skills practically and memorably, reinforcing their importance in effective leadership and teamwork.

Each participant will choose a slip of paper from a container. Each slip will have both a soft skill and a demonstration format. The participant will then demonstrate the soft skill selected for the class using only one sentence spoken in role-play, written down, or conveyed through body language.

Objective:

Demonstrate an understanding of different soft skills through a brief, impactful demonstration.

Instructions:

1. Each participant will draw one slip of paper from the "Soft Skills and Format" container, keeping their assigned soft skill secret from the class.
2. Prepare to demonstrate the chosen soft skill using the assigned format. You can use one sentence only based on the randomly assigned format – spoken in role-play, written down, or conveyed through body language.
3. Present your secret soft skill demonstration to the class.
4. The class evaluates each demonstration and votes on the name of the soft skill. Based on the class evaluation, the soft skills are ranked from hardest to easiest.
